HOGIA SMART POS

Our Hogia Smart POS is an easy to use, internet based program developed according to the rules for cash payment set by the Swedish Tax Agency.

Hogia Smart POS is a modern PC based program suited for small and middle-sized companies regardless of industry. It is simple, easy to use and is logically structured. We are very proud of the graphic design with clean and concise images that will simplify your daily work with the cash register. You can select to work with keyboard, mouse, touch screen or bar code scanners – or combine these as you wish. We even stick our necks out and say that it is difficult to go wrong!

The Internet solution means that you install the program locally on your computer but all information that you enter, such as articles, receipts and so on, are stored on a server located at Hogia. This gives you as a user many advantages; as an administrator of the system, you can log on from any computer and add new articles, manage cashiers, view statistics and retrieve SIE-files. Also, you will never have the need to backup your system or install program updates as this is done automatically by us! If anything should happen to your computer (theft, fire or hard drive malfunction) you only have to reinstall the program on another computer and reconnect to the Hogia server to be up and running again.

If the Internet connection is shut down, you can still continue to work with the cash register as all information is stored locally and synchronized as soon as the connection is reestablished.

GUARANTEED SATISFACTION

If you not completely satisfied with the program within 30 days of purchase, the complete amount will be refunded.

RECOMMENDED REQUIREMENTS:

Operative system:

- Windows XP Professional sp3
- Windows Home Premium
- Processor: 2 GHz

- Internal memory: 2GB

- Program disc space: 5 GB

- Screen resolution: 1024+ 768

- Office: Some features require MC Office 2003 or later

Miscellaneous:

- Internet connection

FEATURES:

- Manages multiple companies. No need for several cash points if there is more than one company in the same premises.
- PC based. Other programs can run at the same time as Hogia Smart POS such as music, e-mail etc.
- Easy to install. You are provided with step-by-step instructions on how to install Hogia Smart POS. If you have any problems or questions, contact our support.
- Create articles designated for your business. You create your own articles and can customize to suit your business prerequisites.
- Unlimited number of articles and article groups. Our program manages many or specific articles if your business requires this.
- Automatic, encrypted backups. If any accident occurs, you only have to re-install the program on another computer and contact our support. We will help you retrieve all data so that you can continue working.
- Automatic program updates. We always update Hogia Smart POS with the latest program and legislative updates so that you can feel safe with your cash register program. Updates are made automatically and you don't need to take any measures to update.
- Support for touch screens and bar code scanner. Integrated cash point terminal. (Add on feature)
